Line Control and KPIs

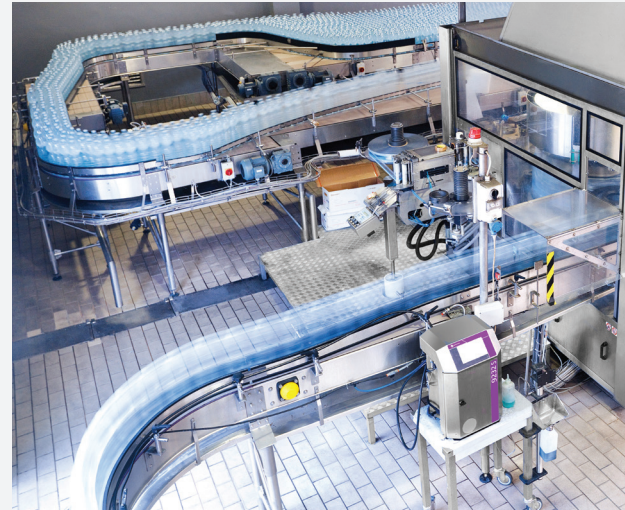

Data. Analysis. Reporting.

Data. Analysis. Reporting.

In today's fast-paced production packaging environment, manufacturers face numerous challenges in maintaining efficient line operations. Inconsistent printer performance, unplanned downtime, and inaccurate productivity metrics hinder optimal output. Manufacturers struggle to:

- Identify areas for improvement
- Make data-driven decisions
- Drive continuous production optimization
- Increase productivity effectively

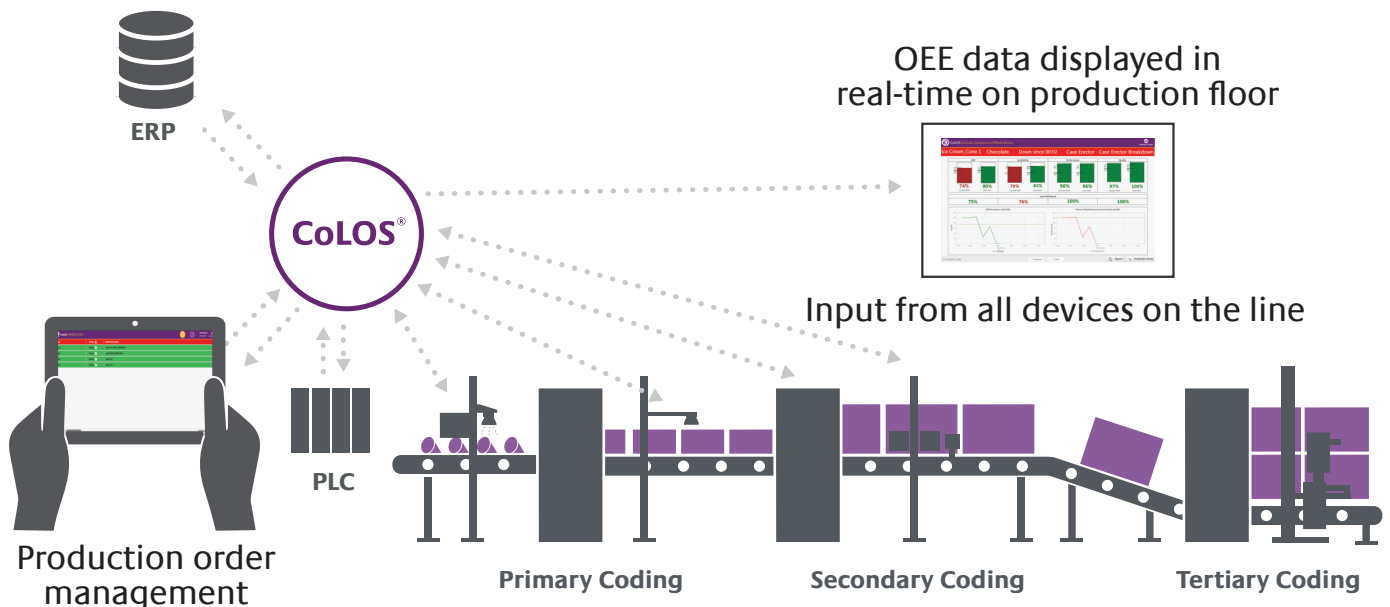

It's time to harness the power of real-time visibility and advanced analytics.

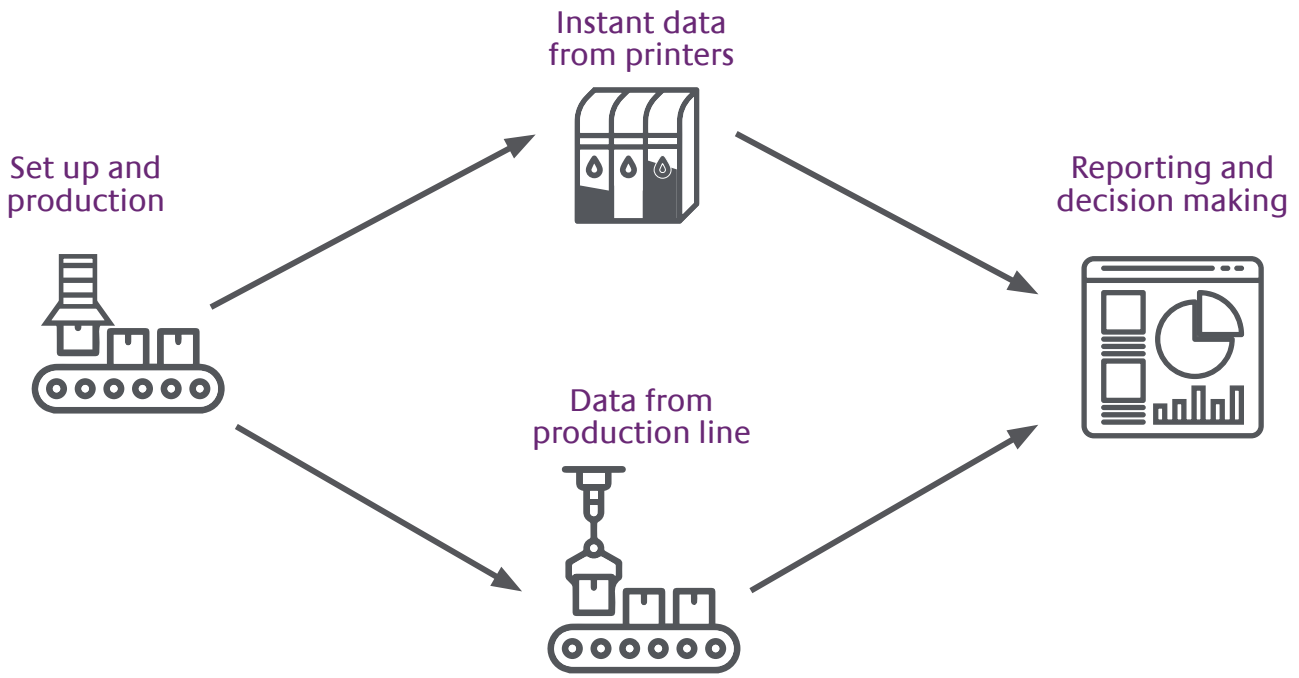

Line Operations and KPIs

Our CoLOS[®] solution is designed to unlock the complete potential of your packaging lines and empowers you to:

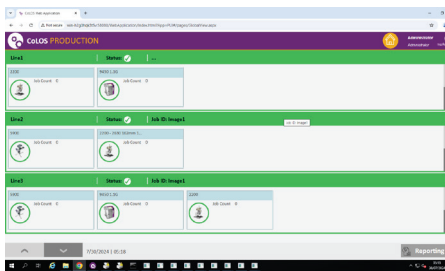

- Access all your production orders on the line from a single interface
- Download production data to all line devices, PLC, Inspection systems and printers
- Monitor printer performance and OEE in real-time
- Identify bottlenecks and areas for improvement
- Allows you to make data-driven decisions to optimize production
- Boost productivity, efficiency, and profitability
- Generate comprehensive reports for analysis and decision-making

Here's how we make it happen

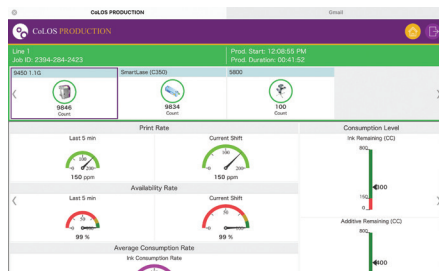

Set-up devices

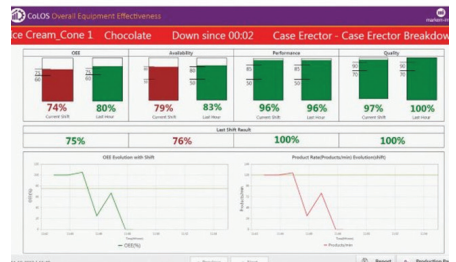

- A single touch automates message input to fields, message printing and communicating back to ERP systems
- Eliminate errors caused by manual message entry by operators
- View and select the production orders deployed on the line/s

Printer performance data

- Proactive maintenance and trouble shooting to reduce downtime
- Receive printer matrix such as speed, uptime, accuracy, print quality etc. in real time
- Receive immediate alerts on faults and incidents by configuring workflows
- Identify bottlenecks and optimize print workflows

OEE & production line data

- Provides insights into the production data and performance of all devices on the production line.
- Identify losses in real-time and optimize production capacity
- Make informed decisions about equipment upgrades, maintenance, and process changes and control quality issues
- Drive continues improvement in efficiency

Reporting and decision making

- Printer Performance provides reports on utilization, volume, speed, fault, ink usage, print quality, historical trends and more.
- OEE provides reports on printer availability, line performance in various shifts, downtime analysis, quality, shift-to-shift, benchmarking and more

Business Impact

Why choose us?

- Make data-driven decisions for maintenance and enhance quality of production
- Identify areas for improvement and optimize production workflow
- Reduce downtime and losses
- Optimize printer usage, speed, volume, and efficiency
- Single source for Hardware, Software, Supplies and Services

Solution Services

Our team will identify which solution, or combination, best suits your needs and oversees all aspects of solution implementation, freeing you up to focus on other priorities. Project management by the Solution Services team ensures seamless and economical implementation of Packaging Intelligence solutions.

Discover	Deliver	Support
We provide workshops or site surveys to help define your requirements for successful projects	We deliver complete turn-key project delivery services. Taking full responsibility for printing technology, vision, software and integration solutions	We offer a competitive range of support contracts for software, device (printer and cameras) and services
